Proclamation

by the Mayor of Rantoul, Illinois

To All to Whom these Presents Shall Come:

Whereas, Autism Spectrum Disorder is the fastest growing developmental disability. The Centers for Disease Control and Prevention estimate that one in 44 Americans currently live with the disability, increasing in US children by 119.4% since 2010. Autism knows no racial, ethnic, or social boundaries, and it affects the young and old alike.

Whereas, Autism is a lifelong neurological disorder that affects each individual differently, ranging from very mild to severe. The learning, thinking, and problem-solving abilities of this disorder can range from gifted to severely challenged. Autism can cause significant social, communication, and behavioral challenges.

Whereas, our understanding of Autism has grown tremendously since it was first diagnosed by psychiatrist in 1943, there is no known cure for Autism. Accurate, early diagnosis, and the resulting appropriate education and intervention, are vital to the future growth and development of the individual.

Whereas, there is a need for continued research into this disorder, hope currently lies in a broad spectrum of treatments, and in an informed public and community committed to providing support and service to individuals diagnosed with Autism Spectrum Disorder.

Whereas, during the month of April, we strive to promote autism awareness, inclusion, and self-determination for all, and assure that each person with Autism Spectrum Disorder is provided an opportunity to achieve the highest possible quality of life.

Now therefore, I, Charles Smith, Mayor of Rantoul, do hereby proclaim the month of April 2024 to be designated as **Autism Awareness and Acceptance Month**, and I urge our Village to participate in this annual observance to celebrate the differences of, learn more about, and empower Autistic individuals in the hope that it will lead to a better understanding of this disorder.

Given Under my hand and the
Corporate Seal of said Rantoul, Illinois
this 1st day of MARCH 2024

Charles Smith

Mayor and President of the Village Board of Trustees

Public Participation

Ronald Scudder spoke about a concern with an employee.

Debbra Sweat addressed the board about the narrowness of roads and the fact that they become one lane when people park on both sides. Work vehicles also park on the roads creating problems.

Items from Trustees

Trustee Hall said there had been two accidents at the corner of Sangamon and Marshall. He addressed the concern to the Police Chief regarding the placement of Stop Signs and possible enforcement. The Police Chief said they could place a digital speed sign there when the weather was warmer as they work off solar power. Public Works said they would look at the placement of the stop signs. Reducing the speed limit would have to go before the board.

Trustee Hall listed three items he and the Administrator are going to discuss. They are 1) updates on Crime Free Housing; 2) the Gun Shot Detection System and 3) having a study to understand DEI and how the Village can be more proactive.

Trustee Crider said there were two lanes on the grass near Veteran's Parkway where people are driving. Staff is exploring options to remedy this problem.

Trustee Workman wanted to address several questions he has been asked by citizens.

1. What company is laying internet cable in the Village? Connexus is doing the installation under the Illinois Broadband Act. This allows them access at no cost. The Village is not charging for them to store or stage their equipment.
2. What steps have been taken to remove three large buildings on the former base, such as the old hospital? The Village takes these issues to the court to abate the code violations.
3. Does the Village have a list of unoccupied properties and work to get them cleaned up? The Village pursues code violations through the courts. If CDBG money is available, the Village occasionally goes forward with demolitions.
4. How much money is being spent on the Downtown Street Scape and when will those funds be spent? The engineering has been completed along with the utility plans. ARPA funds must be used by 2026. DEO Grant by 2025.
5. The buildings on the northside of Sangamon have mostly been updated. Those on the south side have been inspected and there are building owners in the court system to abate the code violations.
6. Is a list of buildings in the Village that are not up to code and is the Village pursuing the code violations? There is no list at this time.
7. How many violations has the Village had for inoperable vehicles and trash? The Administrator will provide that information to the Board tomorrow.

Trustee Wilson asked if the Village had a list of vacant lots. The Administrator said staff is reviewing that information and may have a new list in the next 30-60 days.

ITEM: Motion to Authorize and Approve a Law Enforcement Technology Package for the Police Department with Axon Enterprise, Inc. in the amount of \$910,697.05 over a ten-year period	DEPARTMENT: Police Department
DATE: March 14, 2024	AMOUNT: <u>\$910,697.05</u> Total (over 10-year period)
ATTACHMENTS: 1. Axon Law Enforcement Technology Package 2. Axon Enterprise, Inc 10-Year Agreement	ADMINISTRATIVE NOTES:

SUMMARY HIGHLIGHTS:

Over the next 24 months, the Rantoul Police Department will see their current agreements for the Body Camera Program, the Less-Lethal Program, and the Drone Program all expire. At the same time, technology has advanced past the capabilities of the equipment used by the Department, and end-of-life status makes the resources difficult to repair. With new equipment necessary, and new contracts ready for negotiation, discussions were held with Axon to provide the necessary body cameras, tasers, and drones. Through this process it was determined that entering a ten-year agreement would establish a fixed annual payment for the next decade, allow for replacement of equipment periodically to benefit from new technology, assume maintenance for the term of the contract, and produce significant savings. It also provides for known budgeting, and by agreeing to a long-term commitment, recognize a reduced rate versus annual or short-term contracts. In addition, the fleet (or "in-car") cameras are also in need of replacement.

Following negotiations this week, Axon agreed to an additional \$23,500.00 per year for each of the next ten years to replace and maintain the fleet cameras. Cameras will be replaced now, at five years, and at ten years, and annual maintenance, as well as warranty will be included. This cost is \$1,000.00 per year more than we are paying now, and will be fixed for each of the next ten years. In total, the cost of the ten-year package including the Body Camera Program, the Less-Lethal Program, the Drone Program, the additional needed technological evidence storage, and the fleet cameras will cost

\$910,697.05 over the ten-year period.

RECOMMENDED ACTION: It is recommended the Board of Trustees approve this ten-year agreement.

Year 6	\$39,800.03 (AB4) + \$18,890.91 (Less-lethal) + \$7,490.08 (Drone) = \$66,975.40
Year 7	\$39,800.03 (AB4) + \$18,890.91 (Less-lethal) + \$7,490.08 (Drone) = \$66,975.40
Year 8	\$39,800.03 (AB4) + \$18,890.91 (Less-lethal) + \$7,490.08 (Drone) = \$66,975.40
Year 9	\$39,800.03 (AB4) + \$18,890.91 (Less-lethal) + \$7,490.08 (Drone) = \$66,975.40
Year 10	\$39,800.04 (AB4) + \$18,890.91 (Less-lethal) + \$7,490.08 (Drone) = \$66,975.41

Note – With 5-year agreements, PD and city would re-negotiate a contract at the end of the agreement, subject to price increases over the 5-years (on average 5% per year). 10-year agreement locks in prices at a fixed-rate of inflation below that average, and allows for additional discounts (i.e. body camera prices are locked for the entire 10-year period at a slightly lower cost than the 5-year)

Acceptance

Upon completion of the services outlined in this SOW, AGENCY will be provided a professional services acceptance form ("Acceptance Form"). AGENCY will sign the Acceptance Form acknowledging that services have been completed in substantial conformance with this SOW and the Agreement. If AGENCY reasonably believes AXON did not complete the professional services in conformance with this SOW, AGENCY must notify AXON in writing of the specific reasons within seven (7) calendar days from delivery of the Acceptance Form. AXON will remedy the issues to conform with this SOW and re-present the Acceptance Form for signature. Major components will be salvaged by the AXON Installer for auction by the AGENCY. Wires and cables are not considered expendable and will not be salvaged. Salvaged components will be placed in a designated area by the AGENCY within close proximity of the vehicle in an accessible work space.

Prior to removing the existing mobile video camera systems, it is both the responsibility of the AGENCY and the AXON Installer to test the vehicle's systems' operation to identify and operate, documenting any existing component or system failures and in detail, identify which components of the existing mobile video camera system will be removed by the AXON Installer.

In-Car Hardware/Software Delivery and Installation

Applicable in-car hardware will be installed and configured as defined and validated by the AGENCY during the pre-deployment discovery process.

If a specified vehicle is unavailable on the date and time agreed upon by the parties, AGENCY will provide a similar vehicle for the installation process. Delays due to a vehicle, or substitute vehicle, not being available at agreed upon dates and times may result in additional fees to the AGENCY. If the AXON Installer determines that a vehicle is not properly prepared for installation ("Not Fleet Ready"), such as a battery not being properly charged or properly up-fit for in-service, field operations, the issue shall be reported immediately to the AGENCY for resolution and a date and time for the future installation shall be agreed upon by the parties.

Agreed placement will be documented by the AXON Installer.

AXON welcomes up to 5 persons per system operation training session per day, and unless otherwise agreed upon by the AGENCY, the first vehicle will be used for an installation training demonstration. The second vehicle will be used for an assisted installation training demonstration. The installation training session is customary to any AXON Fleet installation service regardless of who performs the continued Axon Fleet system installations.

The customary training session does not 'certify' a non-AXON Installer, customer-employed Installer or customer 3rd party Installer, since the AXON Fleet products does not offer an Installer certification program. Any work performed by non-AXON Installer, customer-employed Installer or customer 3rd party Installer is not warranted by AXON, and AXON is not liable for any damage to the vehicle and its existing systems and AXON Fleet hardware.

AGENDA ITEM

ITEM: Motion to Authorize and Approve a Contract for the Demolition of the Building at 119 E Sangamon Ave with Lee Farms Excavating, Inc in the Amount of \$144,500.00	DEPARTMENT: Community Development
DATE: March 14, 2024	AMOUNT: \$144,500.00
ATTACHMENTS: 1. Demo 119 E Sangamon Ave - Bid Tabulation Summary 2. Demo Contract - Bid Evaluation Criteria 3. 119 E Sangamon - Demo Contract	ADMINISTRATIVE NOTES:
SUMMARY HIGHLIGHTS: This item provides for the demolition of the Village-owned building at 119 E Sangamon Ave in Downtown Rantoul. This building is the former Hallmark Building, and it was previously conveyed to the Village via court proceedings just over a year ago after having sat vacant and abandoned for many years. The structure has since been analyzed with the feasibility of both rehabbing the building and demolishing the building considered. Unfortunately, the building has continued to deteriorate, and there has been a major failure of the roof structure on the 2-story portion of the building, and the building is in such an advanced state of disrepair that demolition is now the only feasible option for this building. The building shares common walls with adjoining buildings on both sides, making demolition particularly difficult. The project was advertised, and a total of five bids were received and opened on February 1, 2024 at 2 pm. A copy of the bid tabulation is attached for reference. A low bid amount of \$141,000.00 was provided, with a second-lowest bid of \$144,500.00. With these bids being very close for such a large project, references were checked, and the two low bidders were then interviewed onsite by a team of Village staff members. In the discussions with the two low bidders, it became very apparent that one contractor had a substantial amount of expertise and experience with the demolition of similar buildings with similar circumstances, having completed 20+ projects, while the other had less experience and expertise with demolition projects like this one. The bid packets provided to prospective bidders identified the evaluation criteria to be used to determine	

the lowest “responsible bidder” with a copy of those criteria attached for reference. Based on the application of those evaluation criteria, staff determined that the lowest responsible bidder on the project was Lee Farms Excavating, Inc with their bid meeting all requirements, and thus it is recommended that the Lee Farm’s Excavating, Inc bid of \$144,500.00 be accepted.

The funding for this demolition is slated to come from the Village Economic Development Fund 208-0140-450-3029. Demolition would begin within 30 days after approval and be completed within 90 days.

After the demolition is complete, a separate bid will be put together to solicit for the capping, tuckpointing, and cleanup of the newly exposed common walls, which will be necessary because they will now be exposed to the elements.

RECOMMENDED ACTION: Authorize the awarding of a contract to Lee Farms Excavating, Inc. in the amount of \$144,500 for the demolition of the Village owned vacant building at 119 E Sangamon Ave.

make any reasonable investigation deemed necessary and proper to determine the ability of the Contractor to perform the Work, and the Contractor shall furnish to the Village all information for this purpose that may be reasonably requested. The Village reserves the right to accept or to reject any or all bids, or any part thereof, received from any Contractor in connection with this IFB for any reason.

The Contractor shall pay as and to the extent required by the Prevailing Wage Act (820 ILCS 130/0.01 et seq.) not less than the prevailing rate of hourly wages to all laborers, workers and mechanics employed by the Contractor or any subcontractor in connection with the Work. As required by such Prevailing Wage Act, the most recently revised prevailing rate of hourly wages, as determined by the Department of Labor of the State of Illinois, is attached to this Contract as notice to the Contractor of such revised rates. Contractor will comply with all requirements of the State of Illinois prevailing wage act.

Section 4. Contract Term. The Work under this Contract shall be commenced within thirty (30) calendar days after this Contract has been executed by the Village and shall continue until completed within a period not greater than sixty (60) calendar days thereafter, subject to any modifications or earlier termination as provided for in the Contract Documents (the “**Contract Term**”). The Contract Documents shall be and remain in full force and effect for the full period of the Contract Term and thereafter until the Village determines that all requirements and conditions of the Contract Documents have been met and that the Work is deemed complete. No Work shall be deemed complete unless and until it is accepted by the Village.

Section 5. Contract Amount. The Village shall pay to the Contractor, as full and complete consideration for the Contractor’s satisfactory performance of all of its obligations under the Contract Documents, except as may otherwise be specifically provided therein, a total [not to exceed] amount of **one hundred forty four thousand five hundred dollars (\$144,500.00)** for all completed Work provided by the Contractor during the Contract Term, subject to the terms and conditions of the Contract Documents.

Section 6. Payment. After complete performance of the Work in accordance with all applicable provisions of the Contract Documents and upon an invoice submitted by the Contractor to the Village for such completed Work, the Village shall pay the Contractor the amount of such invoice as does not exceed the Contract Amount. Such invoice shall be in such form and detail as may be required by the Village and shall be accompanied by waivers of liens or the equivalent from all suppliers and subcontractors, if any. Such amount shall be paid by the Village within thirty (30) calendar days of the date submitted to the Village by the Contractor, provided, however, that the Village may withhold from such amount a sufficient amount of payment otherwise due to cover any or all of the following:

- (a) any defective Work not otherwise remedied by the Contractor;
- (b) any claim arising in or from the performance of the Work by the Contractor under the Contract Documents; or
- (c) any failure of the Contractor to make any proper payment in connection with the Work to any of the Contractor's laborers, workers, mechanics, suppliers or subcontractors.

Section 7. Performance and Payment Bond. At the time of the execution and delivery of this Contract, the Contractor shall submit both a Performance Bond and a Labor and Material Payment Bond or a combined Performance and Payment Bond in favor of the Village. The Contractor shall not commence any of the Work under the Contract Documents until such bond(s) have been approved by the Village. Such bond(s) shall cover such performance of the Work, including any related services, and all labor, parts, materials, supplies and equipment for the Work as described in the Contract Documents, whether by the Contractor or by any subcontractor. Such bond(s) shall remain in full force and effect for the duration of the Contract Term and thereafter as required by the Contract Documents. Such performance and payment bond(s) shall be conditioned on the full and faithful performance by the Contractor under the Contract Documents and shall be in an amount not less than 100% of the Contract Amount. Should the Contractor fail to perform as required by the Contract Documents or to pay for any services, labor, parts, materials, supplies or equipment in connection with the Work, the Village may draw upon such performance and payment bond(s) to the extent necessary to complete the Work and compensate the Village for any reasonable costs and expenses, including attorney fees, incurred by the Village in connection therewith.

Section 8. Minimum Insurance Requirements. The Contractor and any of its subcontractors may not commence any Work under the Contract Documents until the Contractor and any such subcontractors have obtained and paid for all such insurance as may be required under and pursuant to such sections, and until such insurance has been approved by the Village. The types of insurance coverages and the amounts thereof (denoted in minimum amounts) under the Contract Documents (the "**Minimum Insurance Requirements**") are attached to this Contract and made part hereof:

Section 9. Training and employment opportunities/contracts for work on Contractor Project. The contractor agrees to comply with Section 3 of the Housing and Urban Development Act of 1968, as amended, which requires that to the greatest extent feasible, opportunities for training and employment be given to lower-income residents of Champaign County and contracts for work in connection with the Contractor Project be awarded to eligible business concerns which are located in, or owned in substantial part by, persons residing in Champaign County.

Section 10. Notices. All notices, or other communications under or in respect of the Contract Documents, shall be in writing and shall be deemed to have been given when the same are: (i) deposited in the United States mail and sent by registered or certified mail, postage prepaid, return receipt requested; (ii) personally delivered; (iii) deposited with a nationally-recognized carrier for next day delivery, delivery charge prepaid; or (iv) telecopied; in each case, to the Village and the Contractor at their respective addresses (or at such other address as each may designate by written notice to the other), as follows:

Specification

Conditions of Sale

STANDARD: The seller's standard conditions of sale set forth in Price Sheet 150 apply, except as modified under the "Warranty Qualifications" section on page 3.

SPECIAL TO THIS PRODUCT:

NOTE: S&C Manual PME Pad-Mounted Gear accommodates separable insulated connectors and accessories. This gear must be operated by qualified persons who are thoroughly trained in, and who understand any hazards that may be involved with, the operation of separable insulated connectors and related accessories.

INCLUSIONS: S&C Manual PME Pad-Mounted Gear features elbow-connected encased components. Manual PME models are of freestanding, self-supporting construction—not for bolting directly to transformers—with provisions for cable entrance and exit through the bottom. Enclosures meet the requirements of ANSI C57.12.28 (enclosure integrity).

Access to termination compartments is controlled by the S&C Penta-Latch® Mechanism, which provides automatic door latching and permits padlocking only when the door is securely latched. The door can be opened only with a penta-head socket wrench or tool.

The enclosure roof is undercoated with an insulating "no-drip" compound. A resilient closed-cell gasket on the enclosure bottom flange protects the finish from being scratched during installation and isolates it from the alkalinity of a concrete foundation. Enclosures are protected from corrosion by S&C's olive green Ultradur® Finishing System.

Switch terminals are equipped with 600-ampere-rated bushings, and fuse terminals are equipped with 200-ampere-rated bushing-wells. Bushing and bushing-well interfaces are in accordance with ANSI/IEEE Standard 386 to accept all standard separable insulated connectors and inserts. Parking stands are provided adjacent to each bushing and bushing well. Grounding provisions suitable for use with separable insulated connectors and related accessories are located in each termination compartment. Full-length steel barriers separate adjoining termination compartments (where

applicable). PME models are provided with an instruction manual holder and storage racks on each fuse termination-compartment door for spare S&C Fuse Units, Refill Units, or Interrupting Modules.

All medium-voltage switch and fuse components are completely encased in an inner grounded steel compartment. The component compartment floor of 22-gauge galvanized steel sheet excludes foliage and animals. Fiberglass-reinforced polyester barriers are provided where required to achieve published BIL ratings.

Roof sections over the cable compartments are hinged to allow easy cable pulling during installation.

External handle-operated 600-ampere S&C Mini-Rupter® Switches provide three-pole live switching of three-phase source circuits. A folding switch-operating handle, secured inside the switch-operating-hub pocket, is provided with each Mini-Rupter Switch.

These PME models offer a choice of S&C Power Fuses—Types SME-20 and SME-4Z, or S&C Fault Fiter® Electronic Power Fuses. SME-20 Power Fuses use the S&C SMU-20® Fuse Unit, and SME-4Z Power Fuses use the S&C SM-4® Refill Unit. Fault Fiter Electronic Power Fuse Mountings also accommodate a variety of single-barrel current-limiting fuses, as listed in Tables 12 and 13 on pages 13 and 14. Fuses provide fault protection of the tap circuits, and loadbreak inserts and separable insulated connectors supplied by the user permit single-pole switching of the taps. These units feature S&C TransFuser™ Mountings—fuse-handling mechanisms with a mechanical interlock that guards against gaining access to the fuse before opening the loadbreak separable insulated connector at the fuse terminal. The fuse is accessible only when de-energized and isolated—for full-view non-loadbreak disconnection and removal with a shotgun stick.

Individual ground rings are provided for each fuse mounting to allow convenient grounding of cable concentric neutrals and elbow accessories. These ground rings are also equipped with cable guides to assist in cable training and to prevent cables from interfering with movement of the fuse-access panel.

EXCLUSIONS: Three-phase units listed in Table 3 on pages 4 through 6 do not include the items listed in Table 4 on page 7, nor do they include the connector, fuse components, switch blades, or accessories listed in Table 2 on page 3; Tables 5, 6, and 7 on page 8; Table 14 on page 14; and Table 15 on page 15.

SPECIFICATION DEVIATIONS: Features or modifications other than those listed in Table 4 on page 7 cannot be accommodated. Specifically, the following modifications are not available:

- Relocation of components (switches and fuses)
- Inclusion of bracket- or base-mounted surge arresters or any type of cable-terminating device other than separable insulated connectors
- Mechanical cable interlocks

APPLICATION NOTES: For application information as well as a guide to the selection of appropriate ampere ratings and speeds for S&C SME Power Fuses, and the types and TCC curve parameters of control modules for S&C Fault Fiter Electronic Power Fuses, contact the nearest S&C Sales Office.

Switching with Mini-Rupter

S&C Manual PME Pad-Mounted Gear features S&C Mini-Rupter Switches for three-pole live switching of three-phase circuits.

Complete ratings for Mini-Rupter Switches, as applied in S&C Manual PME Pad-Mounted Gear, are shown Table 1. In addition to the load-dropping ratings shown, Mini-Rupter Switches are capable of interrupting transformer magnetizing currents associated with the applicable loads, as well as line-charging and cable-charging currents typical for distribution systems of these voltage ratings. For applications on systems rated higher than 7.2 kV and involving load current with high harmonic content (such as rectifier load currents), refer to the nearest S&C Sales Office. The three-time duty-cycle fault-closing ratings shown for Mini-Rupter Switches define the ability to close the switches three times against a three-phase fault with asymmetrical current in at least one phase equal to the rated value, with the switch remaining operable and able to carry and interrupt rated current.

A Note on Single-Pole Switching

In using separable insulated connectors (elbows) for single-pole switching of three-phase transformers or transformer banks (or single-phase transformers connected line-to-line) where the maximum system operating voltage exceeds 22 kV, circuit connections or parameters may, in some cases, produce overvoltages that exceed the switching capability of the elbow. Therefore, follow the elbow manufacturer's recommendations and the user's operating and safety procedures for switching such transformers from other than at the transformer location when they are unloaded or lightly loaded.

Recommended Voltage Ratings of Current-Limiting Fuses for Use in S&C Pad-Mounted Gear

In general, current-limiting fuses should have a maximum voltage rating equal to, but not greater than, 140% of the system line-to-line voltage because, for most applications, the fuses can be exposed to full system line-to-line voltage in clearing faults. Although there may be economic or space-saving incentives for using current-limiting fuses with voltage ratings "appropriate for system line-to-ground voltage" (i.e., fuses with a voltage rating lower than line-to-line voltage but greater than or equal to maximum system line-to-ground voltage), S&C can recommend such use only in any of the following applications:

- Protection of single-phase transformers serving single-phase loads
- Protection of three-phase lateral circuits fed by single-conductor shielded cable (provided each transformer on that lateral is individually fused so that the current-limiting fuse serving the lateral will not be required to clear secondary faults)
- Protection of single-phase lateral circuits fed by single-conductor shielded cable where the load is line-to-ground connected

Achieving 25-kA Short-Circuit Rating in 14.4-kV Models

As indicated in Table 3 on pages 4 through 6, specific 14.4-kV models have a short-circuit rating of 25,000 amperes, RMS, symmetrical and 620 MVA. They include:

- PME-4, PME-5, PME-6, PME-9, PME-11, and PME-12, furnished with Fault Fiter mountings, when certain non-S&C-manufactured current-limiting fuses are used, having a rated maximum interrupting current of at least 25,000 amperes, RMS, symmetrical and limiting the instantaneous peak let-through current to less than 36,000 amperes (Refer to Table 13 on page 14.)
- PME-10

In each instance, separable connectors and cables installed in the switch compartments must be rated 25,000 amperes, RMS, symmetrical. In addition, the gear cannot be furnished with optional 200-ampere bushing wells in lieu of 600-ampere bushings at the switch terminals, catalog number suffix “-M4,” or UL listing catalog number suffix “-X.”

WARRANTY QUALIFICATIONS: The standard warranty contained in the seller's standard conditions of sale (as set forth in Price Sheet 150) does not apply to S&C Manual PME Pad-Mounted Gear where fuse units, fuse-unit end fittings, holders, refill units, or switch blades of other than S&C manufacture are used in conjunction with S&C SME Mountings. Nor does it apply to S&C Manual PME Pad-Mounted Gear where other than Fault Fiter Electronic Power Fuses, S&C Switch Blades, or the current-limiting fuses listed in Table 13 on page 14 are used in conjunction with Fault Fiter Electronic Power Fuse Mountings and S&C Holders designed therefore, or when current-limiting fuses are applied other than as set forth under the “Recommended Voltage Ratings of Current-Limiting Fuses for Use in S&C Pad-Mounted Gear” section on page 2.

① Fuse components must be ordered separately.

② Vertical-type portable feed-thru inserts cannot be accommodated in fuse-termination compartments of models furnished with SME-20 Power Fuses or Fault Filter Electronic Power Fuses. Also, "piggybacked" Black-burn 600-ampere T-bodies cannot be accommodated in switch-termination compartments.

③ Compartment numbers appear in corners of each connection diagram.

④ Asymmetrical current rating is 1.6 times symmetrical current rating.

⑤ Short-circuit rating of a complete pad-mounted gear unit may be limited by the ratings of bushing inserts, elbows, T-bodies, fuses, and cables used. Fault-closing and/or short-circuit ratings of switches and bus, and its interrupting ratings of fuses, meet or exceed short-circuit rating of the gear. For complete switch ratings, refer to the "Application Notes" section on page 2.

⑥ Fault Filter Mountings accommodate certain non-S&C-manufactured current-limiting fuses. Refer to Table 13 on page 14. The maximum voltage and current ratings indicated in that table apply. Consult the fuse manufacturer for complete fuse ratings.

★ Available only when the end user is an electric utility.

▲ Optional key interlocks, catalog number suffix "-C3" or "-C4," must be furnished if end user is not an electric utility.

■ SMU-20® Fuse Units are available in ratings through 200K amperes as well as 200E amperes.

◆ Applicable to solidly grounded-neutral systems only, with fuses connected by a single-conductor, concentric-neutral-type cable to a transformer(s). Rating is 9,400 amperes, RMS, symmetrical (405 MVA) for all other applications.

● 25,000 amperes, RMS, symmetrical and 620 MVA when certain non-S&C-manufactured current-limiting fuses are used, having a rated maximum interrupting current of at least 25,000 amperes, RMS, symmetrical and limiting the instantaneous peak let-through current to less than 36,000 amperes. Refer to Table 13 on page 14. Separable connectors and cables installed in switch compartments must be rated 25,000 amperes, RMS, symmetrical; gear cannot be furnished with optional 200-ampere bushing wells in lieu of 600-ampere bushings at switch terminals, catalog number suffix "-M4," or optional UL Listing, catalog number suffix "-X."

① Fuse components must be ordered separately.

② Vertical-type portable feed-thru inserts cannot be accommodated in fuse-termination compartments of models furnished with SME-20 Power Fuses or Fault Filter Electronic Power Fuses. Also, "piggybacked" Blackburn 600-ampere T-bodies cannot be accommodated in switch-termination compartments.

③ Compartment numbers appear in the corners of each connection diagram.

④ Asymmetrical current rating is 1.6 times symmetrical current rating.

⑤ Short-circuit rating of complete pad-mounted gear unit may be limited by ratings of bushing inserts, elbows, T-bodies, fuses, and cables used. Fault-closing and/or short-circuit ratings of switches and bus, and interrupting ratings of fuses meet or exceed short-circuit rating of the gear. For complete switch ratings, refer to the "Application Notes" section on page 2.

⑥ Fault Filter Mountings accommodate certain non-S&C-manufactured current-limiting fuses. Refer to Table 13 on page 14. The maximum voltage and current ratings indicated in that table apply. Consult the fuse manufacturer for complete fuse ratings.

▲ Optional key interlocks, catalog number suffix "-C3" or "-C4," must be furnished if end user is not an electric utility.

① When this optional feature is specified, the entire exterior of the enclosure will be fabricated from 11-gauge Type 304 stainless steel. When ordering optional hexhead actuators, provisions for fault indicators with viewing windows in doors, or a base adapter, specify the correct suffix for use with a stainless steel enclosure.

② When ordering, please furnish the name of ultimate user, station, and location of gear.

③ Fuse assemblies (fuse holders or fuse units with end fittings) are not included. For units equipped with Fault Fiter® Electronic Power Fuse Mountings, only two spare Fault Fiter Electronic Power Fuse Holders or two spare current-limiting fuse holders can be accommodated in each compartment.

④ Choosing this option signifies that wood products to be used in the packaging of any items on international orders must either be hard wood or certified by the wood supplier as having "been heat treated (kiln dried) to a core temperature of 56° Celsius for a minimum of 30 minutes."

⑤ When catalog number suffix "-M4" is specified, the continuous current and short-circuit ratings are limited to the ratings of the bushing wells, bushing inserts, and elbows used. In addition, the pad-mounted gear will not be capable of carrying a 25,000 amperes, RMS, symmetrical short-circuit rating and a 620 MVA rating.

⑥ When catalog number suffix "-X" is specified, the pad-mounted gear will not be capable of carrying a 25,000 amperes, RMS, symmetrical short-circuit rating and a 620 MVA rating.

▼ When ordering catalog number suffix "-B1," "-B2," or "-F2" for use with a stainless steel enclosure, specify catalog number suffix "-B11" instead of "-B1," "-B12" instead of "-B2," or "-F12" instead of "-F2."

❶ Not available if UL listing (catalog number suffix "-X") is specified.

► Not available if hexhead actuator for use in lieu of pentahead actuator on all Penta-Latch Mechanisms (catalog number suffix "-B1," "-B2," "-B11," or "-B12") is specified.

① Fuses must be furnished by others.

② Maximum voltage and current ratings listed apply to the complete pad-mounted gear unit. Consult fuse manufacturer for complete fuse ratings.

③ Holders for 14.4-kV PME models are rated 14.4 kV nominal, 17.0 kV maximum, 200 amperes maximum. Holders for 25-kV PME models are rated 25 kV nominal, 29 kV maximum, 200 amperes maximum.

④ Includes adapter when required.

⑤ All 15.5-kV fuse types listed—except RTE ELX Current-Limiting Fuses—when used in 14.4-kV Model PME-4, PME-5, PME-6, PME-9, PME-11, or PME-12 Pad-Mounted Gear furnished with Fault Fiter mountings, permit the gear to achieve a 25-kA short-circuit rating. Separable connectors and cables installed in the switch compartments must be rated 25,000 amperes, RMS, symmetrical. In addition, the gear cannot be furnished with optional 200-ampere bushing wells in lieu of 600-ampere bushings at the switch terminals, catalog number suffix “-M4.”

AGENDA ITEM

ITEM: Motion to Authorize and Approve a Construction Contract to Develop the Phase One Project for the Wastewater Treatment Plant and Systems with Grunloh Building Inc. in the amount of \$16,060,000.00	DEPARTMENT: Public Works
DATE: March 14, 2024	AMOUNT: \$15,588,207.00 Award <u>\$471.793.00 Contingency</u> \$16,060,000.00 Total
ATTACHMENTS: 1. WWTP Phase 1 Project Bid Tabulation	ADMINISTRATIVE NOTES:

SUMMARY HIGHLIGHTS:

This Agenda item provides for a construction contract with Grunloh Building Inc. in the amount of \$16,060,000.00 to develop the Wastewater Treatment Plant and Systems (Phase 1) Project that will include general construction of wastewater treatment facilities, pump stations, and force main replacement and extension. The Wastewater Treatment Facility improvements include a new dewatering treatment facility, new electrical room, new chemical feed, and storage equipment, and updates to yard piping and valves. Pump Station improvements include pump and valve replacement, new electrical room, and new wet weather pump station. General construction of these structures and new treatment processes includes sitework, yard piping, structural, architectural, process piping and equipment, plumbing, heating, ventilation, air conditioning, electrical and instrumentation, and control.

Pursuant to the Official Advertisement for Bids, sealed bids for the above referenced project were received on December 13, 2023, at 10:00 am local time, and publicly opened and read aloud. We have reviewed the Bids received for the work, and have enclosed a copy of the prepared Bid Tabulation and evaluation for your information and consideration. Three (3) sealed bids were received. The low bid was submitted by Williams Brothers Construction, Inc. of Peoria, Illinois in the amount of \$12,840,00.00. This bid was withdrawn due to a substantial mistake in the preparation of the bid, and is

no longer being considered. See the Williams Brothers withdrawal letter attached. The second low bid was submitted by Grunloh Building, Inc. of Effingham, Illinois, submitted in the amount of \$15,588,207.00. The third low bid was submitted by Schomburg and Schomburg Construction, Inc. of Danville, Illinois in the amount of \$16,304,767.40. It is our opinion that the next lowest bidder, Grunloh Building, Inc., submitted a responsive, responsible bid, and is capable of performing the work as specified.

This construction will be funded out of the reserves of the Wastewater, and then reimbursed by the Illinois Environmental Protection Agency (IEPA) Loan. Account 536-1180-430-75-70.

RECOMMENDED ACTION: Authorize the award of a construction contract with Grunloh Building Inc. in the amount of \$16,060,000.00 to develop the Wastewater Treatment Plant and Systems (Phase 1) Project

Bid Evaluation and Letter of Recommendation
Donohue Project No. 14239

Dear Mr. McCoy:

Pursuant to the Official Advertisement for Bids, sealed bids for the above referenced project were received by the Village of Rantoul at the Rantoul Municipal Building, 333 South Tanner Street, on December 13, 2023 at 10:00 am local time, and publicly opened and read aloud. We have reviewed the Bids received for the Work and have enclosed a copy of the prepared Bid Tabulation and evaluation for your information and consideration.

Three (3) sealed bid were received. The low bid was submitted by Williams Brothers Construction, Inc. of Peoria, Illinois in the amount of \$12,840,00.00. This bid was withdrawn due to a substantial mistake in the preparation of the bid and is no longer being considered. See the Williams Brothers withdrawal letter attached. The second low bid was submitted by Grunloh Building, Inc. of Effingham, Illinois submitted in the amount of \$15,588,207.00. The third low bid was submitted by Schomburg and Schomburg Construction, Inc. of Danville, Illinois in the amount of \$16,304,767.40. It is our opinion that the next lowest bidder, Grunloh Building, Inc., submitted a responsive, responsible bid and is capable of performing the Work as specified. A contract award by the Village of Rantoul would be on the condition of closing the IEPA's SRF Loan.

We respectfully present this analysis and review for consideration by the Village of Rantoul. We will be pleased to answer any question concerning the information presented herein. We are also attaching the Notice of Intent to Award to be executed by the Village.

Sincerely,

A handwritten signature in black ink, appearing to read 'Terry K. Boyer'.

RE: WWTP Improvements Phase 1
Village of Rantoul
Rantoul, Illinois

Mr. McCoy,

Yesterday December 13th, 2023 we submitted the low bid for the WWTP Improvements Phase 1 Dewatering, Disinfection and Lift Stations IEPA Loan L17-3611 for the Village of Rantoul, IL. Immediately after submission of our bid we found a substantial mistake in the preparation of our bid.

Per article 16.03 of section 00 21 13 – Instructions to Bidders we must withdraw our bid as there was a material and substantial mistake in the preparation of our bid. At the time of bid the Wastewater Treatment Equipment for the project was priced on a separate worksheet. When it was calculated the total came out to \$2,160,000.00 (See attachment A). When we input the number into our bid summary we input the number as \$216,000.00 (See attachment B) therefor leaving an approximately 2 million dollar mistake.

We apologize for this error, this has rarely happened in our 50 year existence. We wish the City success on the project moving forward, and we are extremely disappointed that we will not be able to be a part of this project.

Respectfully,

WILLIAMS BROTHERS CONSTRUCTION, INC.

The coverage is to be at least \$1,000,000 per person and \$2,000,000 aggregate, and is to include IDOT, its officials, employees, and agents. **A RESOLUTION
REGARDING TEMPORARY CLOSING OF STATE RIGHT-OF-WAY
FOR A PARADE (INDEPENDENCE DAY)**

WHEREAS, the Village of Rantoul, Champaign County, Illinois ("Village") sponsors or coordinates certain parades, festivals or similar events within the village which constitute a public purpose; and,

WHEREAS, many of the above-described events are held on, along, or pass through State Routes; and,

WHEREAS, Section 4-408 of the Illinois Highway Code authorizes the Illinois Department of Transportation ("IDOT") to issue permits to local authorities to temporarily close portions of State Routes for such public purposes; and,

WHEREAS, an Independence Day parade will be conducted on July 4, 2024, which will require the temporary closure of portions of State Route 136, a State Highway in the Village of Rantoul, being from North Maplewood Drive to East Grove Avenue and crossing State Route 136 at Frederick Street.

NOW THEREFORE, BE IT RESOLVED BY THE PRESIDENT AND BOARD OF TRUSTEES OF THE VILLAGE OF RANTOUL, CHAMPAIGN COUNTY, ILLINOIS, as follows:

Section 1. That the President and Board of Trustees of the Village hereby request a permit be issued by IDOT for the Independence Day parade to occur on July 4, 2024, such permit allowing the temporary closure of State Route 136, a State Highway in the Village of Rantoul, being from North Maplewood Drive to East Grove Avenue and crossing State Route 136 at Frederick Street. A map of the parade route is attached hereto and incorporated by reference herein.

Section 2. The following shall apply to the request for a permit and to the event:

- A. The Village or the Sponsor of the event shall provide a comprehensive general liability policy or an additional named insured endorsement in the minimum amount of \$1,000,000 per person and \$2,000,000 aggregate, which has the Illinois Department of Transportation, its officials, employees, and agents as insureds, and which protects them from all claims arising from the requested road closing. A copy of said policy or endorsement will be provided to IDOT before the road is closed.
- B. The traffic from the closed portion of the State Route shall be detoured over routes with an all-weather surface that can accept the anticipated traffic, which will be maintained to the satisfaction of IDOT, and which is conspicuously marked for the benefit of traffic diverted from the State Route. The closure and

detour shall be marked according to the Illinois Manual on Uniform Traffic Control Devices.

- C. Police officers or authorized flaggers shall, at the expense of the Village, be positioned at each end of the closed section of such State Route and at other points as may be necessary to assist in directing traffic through the temporary detour. Police officers or authorized flaggers shall permit emergency vehicles in emergency situations pass through the closed area as swiftly and safely as possible for all concerned.
- D. When a State Route is closed for less than fifteen (15) minutes, police officers, at the expense of the Village, shall stop traffic for a period not to exceed fifteen (15) minutes, and an occasional break shall be made in the procession so that traffic may pass through.
- E. The Village assumes full responsibility for the direction, protection, and regulation of traffic during the time any detour is in effect.
- F. The Village agrees to assume all liabilities and pay all claims for any damage, which shall be occasioned by the closing described above, and to hold harmless the State of Illinois from all claims arising from the requested closure of the State Route.
- G. All debris shall be removed prior to re-opening the State Route.

Section 3. A copy of this Resolution shall be forwarded to the appropriate office of IDOT to serve as a formal authorization to request the closure of the State Route described above for the purpose identified.
